ADVANCED DOCUMENT WORKFLOW FOR EDUCATORS

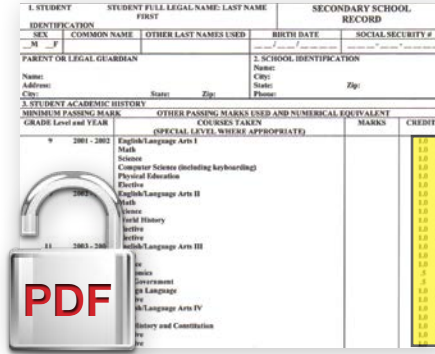

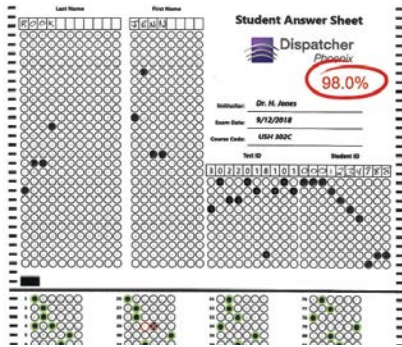

Dispatcher

Phoenix Education

SHARE

In colleges, universities, local and citywide school districts, K-12 schools and training programs, the rising tide of paperwork has put an increasing strain on productivity and cost-efficiency. To handle this growing workload and allow educators to spend more time in the classroom, Konica Minolta is pleased to offer Dispatcher® Phoenix Education, an advanced document workflow solution designed for educational professionals.

Whether it's automating repetitive manual tasks, grading bubble sheet tests, sharing admission applications quickly and easily, converting educational documents to searchable and editable text, or indexing student records at the MFP panel, Dispatcher Phoenix Education simplifies document processing for both educators and administrators.

Grade and Analyze Tests.

Teachers can quickly and easily create and print out their own bubble sheet tests on plain paper, then scan and grade the results. The Bubble Grader test grading solution saves educators from having to manually grade student tests and helps them easily assess classroom performance with automatically generated data reports – all without the need for expensive preprinted bubble sheet forms or complex test scanning systems.

Safeguard and Secure Student Records.

Student records can include sensitive information about grades, teacher evaluations, or psychological profiles that must be safeguarded. With Dispatcher Phoenix Education's intelligent Redaction process, you can permanently redact sensitive information from files – automatically. For additional security, scanned documents can also be converted to password-protected PDF documents.

Automatically Extract Transcript Data.

Instead of manually entering transcript data, Dispatcher Phoenix Education's Advanced OCR feature allows you to automatically extract key information from student transcripts for use in other applications. This extracted data can be used to rename, organize, and route files as well as optimize your productivity to better serve students, staff, faculty, and alumni.

ACCESS

Schools are overwhelmed by the vast volume of paperwork that comes in every year, whether it's student transcripts, transfer requests, admission application forms or student exams. And off-site storage facilities are not only expensive but inconvenient as well. With Dispatcher Phoenix Education's automated workflows, you can scan and distribute documents to network and local folders, email recipients, FTP servers, document management systems, such as Microsoft SharePoint®, and cloud storage services such as Box, Google Drive, Dropbox, WebDAV, Microsoft OneDrive, FilesAnywhere, and FileAssist, Konica Minolta's cloud-based document management solution.

Dispatcher Phoenix Education can also provide image files and file metadata for use in educational back-end systems, giving you instant accessibility to the information you need, exactly when you need it.

Scan to the Cloud with Single Sign-On.

Scanning to the cloud has never been easier. With Dispatcher Phoenix's support for Single Sign-On (SSO) and convenient set-up via a web-based Cloud Accounts Tool, MFP users can access their cloud account immediately once authenticated at the MFP – no additional logging in is necessary! Dispatcher Phoenix provides direct connectors to popular document management systems and cloud applications, including SharePoint, SharePoint Online, Google Drive, Box, Dropbox, OneDrive, OneDrive for Business, and much more.

Edit Document After Scanning.

Searching through or modifying student records and other paperwork is easy with Dispatcher Phoenix Education. Your scanned documents can be automatically converted to editable and searchable formats, such as text, Microsoft Word, Microsoft Excel, PDF Searchable, PDF/A for archiving, etc.

AUTOMATE

Dispatcher Phoenix Education is a member of the Dispatcher Phoenix family of workflow automation products designed to streamline and automate document processing. Other features include:

Watermark:

Automatically add “Confidential” watermarks or the school’s logo as the background to scanned documents.

Highlight/Strikeout:

Mark up key student information in forms, applications, transcripts, and other important education records using intelligent technology.

MFP Panel Integration:

Scan, index, process, and route education records directly from the MFP. Dispatcher Phoenix Education’s folder browsing feature allows you to view a Windows Explorer-like view of your PC’s folder structure to easily find a scan destination folder.

Image Enhancement:

Improve the readability of scanned student loan applications and other educational forms with Dispatcher Phoenix Education’s automatic Despeckle and Deskew processes.

Annotate:

Automatically mark student admission materials as “received,” with the current date and time and send to the appropriate admissions committee member.
